### To Whom-So-Ever It May Concern

This is with reference to Daksh Kasi, who has successfully completed his internship project by being a part of our team here with us at Kumon JP Nagar Phase 2, Bangalore.

The internship program required Daksh to help parse the very detailed Kumon Center Management file in excel format to extract important metrics related to performance of the Kumon study center and present trends in performance metrics across multiple years.

Daksh helped build a comprehensive system that could extract these *performance metrics, render them on the screen as graphs and then export* the data to a powerpoint slide. This reduced the data processing time for our center staff from a couple of days to a few minutes and presented significant time savings. Daksh was able to quickly ramp up on the requirements of the project and was independently able to work through all the complexities that were presented.

The internship lasted almost 3 months, from May 3rd, 2024 till July 25<sup>th</sup>, 2024.

Daksh showed a meticulous approach towards his work and was always eager to accept any requirements creep into the project with a smile on his face. His can-do attitude and technical prowess were an asset to our team at Kumon and helped the team immensely with his work.

Having completed all the formalities on the internship & project deliverables, we at Kumon JP Nagar Phase 2, wish Daksh the very best and all success in future endeavors.

Yours Sincerely

For KUMON JP NAGAR PH2
